

86. A method of treatment of a disorder of the central nervous system of a human patient, other than a brain tumor, comprising:

localizing the disorder to the brainstem and limbic system of said patient;  
administering one or more drugs to said patient that block calcium intake channels of body cells;  
administering one or more drugs to said patient that [aid in inhibition] of neural activity in the brain; and  
monitoring said patient's response.

87. The method of claim 86 further comprising:

administering to said patient at least one [anti-viral drug.]

88. The method of claim 86 further comprising:

administering to said patient at least one [anti-fungal drug.]

89. The method of claim 86 further comprising:

administering to said patient at least one [antibiotic drug.]

90. The method of claim 86 further comprising:

administering to said patient at least [one substance that provides immune system equilibrium.]

91. The method of claim 86 further comprising:

administering to said patient at least one drug that [inhibits body actions  
that lead to blood clotting.]

92. The method of claim 86 further comprising:

administering to said patient at least one drug that [acts as a chelating agent.]

93. The method of claim 86 further comprising:

administering to said patient at least one drug that acts so as [to relieve at  
least one symptom of psychosis.]

94. A method of treatment of a disorder of the brainstem of a patient  
which also involves a disorder of at least one other part of the patient's body  
comprising:

administration of one or more drugs to said patient that act so as to block  
the [calcium intake channels of body cells;]

administration of one or more drugs to said patient that act so as to [aid in  
inhibition of neural activity in the human brain; and]

administration to said patient of at least one substance that acts to provide  
immune system equilibrium to the body.

95. The method of claim 94 further comprising:

administration to said patient at least one antiviral drug.

96. The method of claim 94 further comprising:

administration to said patient at least one anti-fungal drug.

97. The method of claim 94 further comprising:

administration to said patient at least one antibiotic drug.

98. The method of claim 94 further comprising:

administration to said patient at least one drug that acts so as to inhibit

body actions that lead to blood clotting.

99. The method of claim 94 further comprising:

administration to said patient at least one drug that acts as a chelating agent so as to remove toxic substances from the human body.

100. The method of claim 94 further comprising:

administration to said patient of growth hormone or a growth hormone

releasing substance.

101. The method of claim 94 further comprising:

administration to said patient of oxygen that will reach the arterial blood of the patient.

102. The method of claim 94 further comprising:

DK administration of modalities and drugs that treat parts of the human body other than the brainstem.

103. The method of claim 94 further comprising:

administration to said patient at least one drug that acts so as to relieve at least one symptom of psychosis.

104. The method of claim 94 further comprising:

monitoring the treatment process with suitable clinical examination and laboratory tests.

---

**REMARKS**

Applicant and his counsel wish to express their thanks to PTO Examiner Dr. Travers for his courtesy and frankness during the telephone interview on December 31, 2002. During that interview, Dr. Travers said that the claims presented for examination as of November 26, 2002 are, in Dr. Travers' opinion, properly
